FEATURES & OPTIONS

Vehicle Description

Mechanics special. It's a true 4x4 with excellent winter tires, heated seats, AC, power windows, cruise control, and sunroof. This Nissan has a normal 4-speed automatic transmission, not a CVT, and the engine features a timing chain instead of belt, making the X-Trail quite reliable. It drives nicely as is, but will need a new left front CV joint, rear swaybar bushings, and front lower ball joints. Keep the price down by doing the work yourself, or we have us take care of it. The windshield also has a crack. But it's cheap, so come check it out!

Warranty is 10% off parts and labour for 30 days.
